CT - Series Cable Reel Trailers

The CT - Series cable reel trailers from Schutt Industries provides budget-conscious companies a basic, quality reel trailer. The variety of payload, reel diameter and reel width capacities offer flexibility. Safety features like electric brakes with emergency breakaway system combined with LED lighting, safety chains and chock blocks ensure productivity in a safe environment. Depending upon your cable needs, a gas engine powered hydraulics reel driver and small front reel bar for CATV and telephone reels is available.

But the bottom line is, will the Schutt CT Series increase productivity while keeping expense at a minimum both now and throughout the life of the trailer? The answer is a resounding yes!

About Schutt Industries

Schutt Industries, a \$100 million company, is the leading manufacturer of trailering systems for the United States military. The company's experience in providing durable trailers that withstand the rigors of the battlefield is now available for commercial use.
